Dr. Steven Treon, M.D., Ph.D.
Prof. of Medicine, Harvard Medical School
Dana-Farber Cancer Institute
Director, Bing Center for WM

Hi everyone, (**Save the Date Sunday, April 23rd, 11 AM**)

As I hinted, I have very exciting news to share regarding our April 23rd meeting. The New York Metro Support Group will meet that day at a different time for this meeting only: 11:00 AM to 2:00 PM (-ish). Our group is invited to receive an update on the latest advances in clinical and laboratory research presented by Dr. Steven Treon, MD PhD, Professor of Medicine, Harvard Medical School and the Bing Center for Waldenstrom's Macroglobulinemia.

This is an extraordinary opportunity for us to connect in a small-group setting with Dr. Treon and Christopher Patterson.

Anticipating the need for more space, we have arranged to meet at the Zuckerman Auditorium of *Memorial Sloan Kettering Cancer Institute*, 417 East 68th St., New York, NY 10065, just two blocks (a 3-minute walk) south of our regular location. The Zuckerman Auditorium is located on the ground floor, Room RC-105. Parking from Memorial Hospital Inpatient is available.

To register, kindly respond to me quickly at **morfuss@aol.com** so we can pre-estimate a headcount. Please pass this message to others…especially to anyone recently diagnosed or exploring treatment…you feel would be interested in hearing the latest news from the acknowledged world leader in WM research and practice.

In your reply to me, please provide: 1. Your name 2. Names of guests 3. Email addresses, and 4. City/State/Zip Codes.

Hope to see you and your guests on Sunday, April 23rd, starting at 11:00 AM at MSKCC. It will be a memorable meeting you won't want to miss.

Best,
Mitch
