

Hi Friends,

The Waldenstrom's Macroglobulinemia (WM) Support Group spring meeting will be on Sunday afternoon, June 4th from 1-3:30pm. Join us at Dana Farber in the Yawkey Center (RM 306) located at 450 Brookline Avenue, Boston MA.

Dr Steven Treon, MD, PhD, will be the guest lecturer for the afternoon. His topic will be on the "*Genomic Advances in WM*". This will be a discussion covering the basic understanding of WM genomics to the clinical trials correlating to the genomic evolution and understanding discovered in the Bing Center for WM's lab. Question and Answer period will follow.

This is also a chance for you to meet other WMer's who are dealing with this rare blood cancer, and particularly interested in welcoming recently diagnosed patients and their caregivers. So much to learn, so much hope and progress.

If possible, would you kindly respond to Chris Patterson or Eileen Sullivan in order to estimate a headcount. Please pass this message to anyone you feel would be interested especially anyone recently diagnosed or exploring treatment.

We look forward to seeing you.

Eileen Sullivan
Eastern MA IWMF Support Group Leader
